DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3, 5, 7-16, drawn to an expression cassette comprising an HPPD encoding gene, vectors, host cells and transformed plants comprising an HPPD sequence and a method of making said transformed plant.

Group II, claim(s) 1-2, 6-16, drawn to an expression cassette comprising an anti-HGD sequence, vectors, host cells and transformed plants comprising an anti-HGD sequence and a method of making said transformed plant.

Group III, claim(s) 1-5, 7-16, drawn to an expression cassette comprising an HPPD encoding gene and an anti-HGD sequence, vectors, host cells and transformed plants comprising an HPPD sequence and an anti-HGD sequence, and a method of making said transformed plant.

Group IV, claim(s) 17-18, drawn to methods of obtaining tocopherols by using expression cassette comprising an HPPD gene or an anti-HGD gene or both.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of an expression cassette comprising an HPPD gene was known in the art. Norris S. *et al.* Plant Physiology, 1998; Vol. 117, pp. 1317-1323, teach complementation of the *Arabidopsis pds1* mutant using the p-hydroxyphenylpyruvate dioxygenase (HPPD gene) from *Arabidopsis* on page 1319 column 2 in the results, and in Figure 2 on page 1320; and thus there is no special technical feature linking Groups I, III and IV. Further, the expression cassette comprising an HPPD gene of Groups I, III or IV, and the expression cassette comprising an HGD gene of Group II or Group IV, drawn only to an anti-HGD nucleic acid sequence, do not exhibit a corresponding special technical feature because the HPPD and HGD genes do not share a common core structure.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
